# Who we Are?

We are deal in Forex Trading. Forex is a portmanteau of foreign currency and exchange. Foreign exchange is the process of changing one currency into another currency for a variety of reasons, usually for commerce, trading or tourism. According to a recent triennial report from the Bank for International Settlements (a global bank for national central banks), the average was more than USD trillion in daily forex trading volume.

Forex, also known as foreign exchange, FX or currency trading, is a decentralized global market where all the world's currencies trade. The forex is the largest capital marketplace in the world

# What is Forex Trading?

Forex trading, also known as foreign exchange trading or FX trading, is the act of buying and selling currencies in the global foreign exchange market with the goal of making a profit. It is the largest and most liquid financial market in the world, with an estimated daily trading volume exceeding \$6 trillion. Forex trading occurs 24 hours a day, five days a week, and involves the exchange of one currency for another. Traders aim to profit from fluctuations in currency prices by buying a currency at a lower price and selling it at a higher price or vice versa.

## How Forex Trading Works

In Forex trading, currencies are always quoted in pairs, such as EUR/USD (Euro/US Dollar), GBP/JPY (British Pound/Japanese Yen), or USD/JPY (US Dollar/Japanese Yen). Each currency pair consists of two currencies: the **base currency** (the first currency in the pair) and the **quote currency** (the second currency). The price of the pair indicates how much of the quote currency is needed to buy one unit of the base currency. For example, if EUR/USD is quoted at 1.10, it means 1 Euro (EUR) is equivalent to 1.10 US Dollars (USD).

# Foreign Exchange Market

The foreign exchange market (Forex, FX, or currency market) is a global decentralized or over-the-counter (OTC) market for the trading of currencies. This market determines foreign exchange rates for every currency. It includes all aspects of buying, selling and exchanging currencies at current or determined prices. In terms of trading volume, it is by far the largest market in the world, followed by the credit market.

The main participants in this market are the larger international banks. Financial centers around the world function as anchors of trading between a wide range of multiple types of buyers and sellers around the clock, with the exception of weekends. Since currencies are always traded in pairs, the foreign exchange market does not set a currency's absolute value but rather determines its relative value by setting the market price of one currency if paid for with another. Ex: USD 1 is worth X CAD, or CHF, or JPY, etc.

# What is CRYPTO CURRENCY ?

## IS THE FUTURE OF FINANCE

Cryptocurrency is a type of digital currency that allows users to make transfers in the digital space. The term is formed by merging the words cryptography (data encryption) and currency.

Cryptography plays an important role in cryptocurrency, providing reliable data encryption and protecting transactions from interference from third parties. So, the money we are used to is a centralized system. For mutual settlements we need an intermediary — usually a bank. In the case of cryptocurrency, we don't need an intermediary. You can make payments directly (peer-to-peer, p2p). Once again, the blockchain will survive, as the remaining devices will have a full record of all transactions.

# What is Cryptocurrency Trading?

Cryptocurrency trading is the process of buying and selling digital currencies on platforms known as exchanges, where traders aim to profit from price fluctuations. Cryptocurrencies are decentralized digital assets that use cryptography for secure transactions. They operate on blockchain technology, which ensures transparency and immutability. Well-known cryptocurrencies include Bitcoin (BTC), Ethereum (ETH), and Ripple (XRP).

Trading cryptocurrencies is similar to trading stocks or commodities, but it involves digital assets that exist only online. The primary goal of cryptocurrency trading is to buy low and sell high or to short sell when expecting the price to fall. This type of trading has gained immense popularity due to the potential for high returns, but it is also highly speculative and carries significant risks.

# How can CryPtw help you?

CryPtw is a finance marketing company to help the people to pursue their dreams and to make wonderful lifestyle. We help the to achieve their goals of life. We believe on our strength to make a successful life and give a quality of life to leave in this beautiful world.

# How Trading Works?

## Allocation Method

CryPtw Account Service allows Fund Managers to trade with the funds of multiple CryPtw Investor Accounts for a pre-agreed Performance Fee (%). Profits and losses made on the CryPtw Manager's Account are automatically allocated to each Investor's Account based on the amount they invested.

Here's an example to see the Profit/Loss Allocation method in action:

The funds of the CryPtw Manager and Investors are all invested in the Manager's account. The amount of equity they invest determines their share of the overall investment, which results in their potential share of any profit/loss.

## Distribution of Profit/Loss

When positions on the CryPtw Manager account are closed and the account balance increases, so when a Manager is profitable, the profits will be split among all Investors in the account based on their contribution.
